

Wall-mounted storage solution

Storage should be as practical as it is stylish. Wall-mounted storage solutions from Pelly System have stylish and durable details that can be easily developed and built on according to future needs.

With Pelly System you can create a smart storage in the hall, laundry room, storage room or in other rooms in your home where you want to have order.

Hanging and wall slides

The basis of the storage is the slides. Here we offer two different solutions. For easy and quick assembly, a top track in combination with hanging slides is recommended. Since only the top track is screwed into the wall, fewer screw holes are required - the flexibility is maximum because the hanging slides are hung up on the top track and can easily be moved sideways.

The second option is wall slides. These are screwed directly into the wall.

Pull-out frame with baskets

In the pull-out frame, which is hung directly into the hanging or wall slides, you can choose to have either an elegant fine mesh basket or a wire basket.

Wooden and wire shelves

Shelves are available of both wood and wire in two different depths and several widths. The wooden shelves are made of heavy duty 22 mm melamine coated chipboard with a durable edge strip on three sides.

Consoles

The consoles are available in different sizes. They are adapted either for wooden or wire shelves.

Other accessories

Closet rodd with bracket, extendable clothes bar for wooden shelf, trouser pull-out, shoe holder, hooks, book and gable support are examples of smart accessories that you can supplement the storage with.
